

## Final High School Transcript Report - Content Definitions

The data contained within this report is updated daily. It reflects the progress that local high schools have made in submitting and verifying transcript data on behalf of their students for the purpose of determining grade eligibility for the HOPE Scholarship.

The following definitions apply to the column headers:

- “District ID” is a three-digit number assigned to public school districts by the State of Georgia (ex. Appling County Schools = 601” – for all private schools the code is “101”;
- “District Name” is the name of the Georgia public school district – all private schools are designated “PRIVATE HIGH SCHOOL”;
- “CEEB” is the six-digit number assigned by the College Entrance Examination Board to high schools;
- “High School” is the name of the public or private Georgia high school;
- “Number of Uploaded Transcripts” is the number of transcripts uploaded by each local high school and released to the GSFC for the purpose of calculating eligibility for the HOPE Scholarship – only seniors should be uploaded at this time;
- “Number of Students Verified” is the sum of the students listed on the “Eligible” and the “Ineligible” students verified by a high school (see notes below);
- “Verification Status” of green indicates that a high school has verified a substantial portion of the students it uploaded – a status of red indicates that a large number of students remain unverified.

The number of verified students may be less than the number of uploaded transcripts for any of the following reasons:

- The high school may have verified none or only a portion of their students – for example, only the “Eligible” list or only the “Ineligible list”;
- Students without a graduation date (error “112”) will not have calculated grade point averages – these students may have incomplete graduation requirements – when and if these requirements are met and the student is re-uploaded, the student’s grade point averages will be recalculated and eligibility determined;
- High schools may have previously verified both eligible and ineligible lists, but, due to subsequent uploads, may still have unverified students whose grade point averages have been calculated – it is important for the high school to verify all eligible and ineligible students;
- Student transcripts that have been uploaded and released to GSFC may have errors that cause the grade point average calculation to fail – these students will be listed on the error report. Examples for this may include missing grades (error “101”), missing credits (error “102”), etc. Once the errors are corrected, the student’s grade point average will be calculated and the student will be added to an “Eligible” or an “Ineligible” list which must then be verified by the high school;
- The school may have a large population of students that have withdrawn or transferred. All student statuses other than G (for graduated) are ineligible for the awarding of the HOPE Scholarship and will not be calculated. Students that have withdrawn or transferred have a student status of W or T. Because these students’ GPAs have not been calculated, schools cannot verify these students. Thus, the number of verified students will be less than the number of uploaded transcripts;
- Students who have received high school credentials that do not qualify them for the HOPE Scholarship (special education diplomas, certificates of attendance, etc.) will be listed on the error report but will not show up on either “Eligible” or “Ineligible” lists (the error type will be “110”;
- Students whose graduation shows up at more than one school will be listed on the error report and not on either the “Eligible” or “Ineligible” list (the second school sending up data for the student will receive error “107” and will be given the CEEB and name of the other school sending transcript data for the student in question’
- The number of transcripts uploaded (unique students) should be equal to the number of verified students (eligible plus ineligible) plus the number of unverified students (students with calculated grade point averages) plus the number of students on the error report made available to the high school.

It is important to note that students will not be put on the list of HOPE-eligible students until the local high school has verified an “Eligible” report that includes the student’s summary calculation and student identifier. If a school clears data analysis, uploads transcripts and releases them to GSFC, and receives the GSFC-generated reports, the job is still not completed until data errors are corrected and both “Eligible” and “Ineligible” lists are verified. Postsecondary schools cannot successfully invoice GSFC for HOPE Scholarship awards until the students appear on the eligible student list.

Any questions about the number of students verified by the school should be directed to the school.
